

CASE STUDY

The Burtons are a family of five who decided to invest in a home battery storage system to bring down their monthly electricity bill and protect themselves against future prices rises.

The Burtons are a typical family of 5, using between 10-13kWh on any given day.

Mr Burton first contacted EE Renewables with the view of reducing his electricity bills, with Mr burtons' usage being around the 10-13kWh mark us at EE Renewables suggest Mr Burton go for our Lux ACS + 9.6kWh Uhome storage kit. Mr Burton is now storing energy during the night a quarter of is normal rate, meaning his energy bills have been reduced by 75%.

Mr Burton – “ We were extremely happy with the service provided by EE Renewables since the batteries have been installed our energy bills have dropped considerably, having a home battery system is something we would recommend to anyone.
