

CASE STUDY

Mr and Mrs Clayborne are a retired couple living on the south coast of England.

Since the energy crisis in 2022 Mr and Mrs Clayborne have been keen on finding new ways to cut their energy bills and protect themselves against further rising costs.

Mr and Mrs Clayborne first contacted EE Energy to find out more about what a battery system could do for them.

After a visit from one of our representatives who analysed Mr and Mrs Clayborne's energy usage and suggested our Growatt 6.6kWh kit, Mr and Mrs Clayborne have seen over a 60% decrease in their electricity bill.

Mrs Clayborne "EE Energy did a fantastic job from start to finish. Darren was very knowledgeable and recommended a system that we are thoroughly happy with."
